

ABDUL REHMAN

Lahore, Pakistan | +92 318 4175750 | abdulrehmanhanif08@gmail.com

PROFILE

Data Science graduate specializing in Generative AI, LLM orchestration, and scalable AI-driven applications. Strong experience with LangChain, LangGraph, Groq API, RAG pipelines, and multi-agent automation workflows. Skilled across MERN Stack, machine learning, NLP, deep learning, and cloud-based model deployment.

EDUCATION

Bachelor of Science in Data Science

University of Management and Technology, Lahore

2021 – 2025

Intermediate (Pre-Engineering)

CFE Colleges, Lahore

2019 – 2021

TECHNICAL SKILLS

- **Generative AI & LLMs:** LangChain, LangGraph, Groq API, Prompt Engineering, RAG Pipelines, Vector DBs
- **NLP & ML:** Transformers, Tokenization, CNNs, RNNs, Scikit-learn, TensorFlow
- **Software Development:** Python, JavaScript, MERN Stack (React, Node.js, Express, MongoDB)
- **Tools:** Git, Power BI, Postman, Jupyter Notebook

UNIVERSITY PROJECTS

- Mental Health Chatbot – AI-enabled MERN Stack chatbot using LangChain + Hugging Face for NLP-based mental health guidance.
- Sales & Operations Power BI Dashboard – Interactive real-time dashboard for KPIs, sales analytics, and operational reporting.
- Student Performance Prediction Model – Regression model in Python/Scikit-learn to predict academic success using historical data.
- Customer Segmentation System – K-Means clustering with PCA for customer segmentation and behavioral group insights.
- Sentiment Analysis Engine – NLP-based sentiment analysis for social media platforms using tokenization and TF-IDF.

INTERNSHIP EXPERIENCE

Generative AI Intern – ICRL Lab, UET Lahore (NCAI)

Worked on advanced LLM-based AI systems, multi-agent workflow automation, retrieval-augmented generation, and custom LLM pipeline development using state-of-the-art open-source frameworks.

- Developed multi-agent orchestration workflow using LangGraph with state management and memory.
- Built a domain-specific RAG chatbot using LangChain, FAISS embeddings, and Groq-powered inference.
- Created an automated PDF/CV analyzer using LangChain document loaders and structured output parsing.
- Built an LLM API Model Runner for dynamic model selection, temperature tuning, and structured prompting.
- Completed UET ICRL Prompt Engineering course with hands-on work on reasoning and tool-calling prompts.

OTHER EXPERIENCE

Salesforce Developer & Admin (Trainee)

Worked on automation flows, Apex integration, and custom UI components for internal dashboards.

Data Analyst Intern – Tetra Pak Lahore

Cleaned, analyzed, and visualized operational datasets to improve reporting efficiency.

Unity Game Developer – Lahore

Developed gameplay mechanics and UI logic using C# for cross-platform game prototypes.
